

● **MAKE BETTER DECISIONS,  
MORE EFFICIENTLY.**

FASTER, POLICY-AWARE  
DILIGENCE

## The Challenge

Building effective portfolios demands significant time and resources. Key questions often arise:

- How do you ensure a comprehensive understanding of the market?
- How do you efficiently evaluate IP?
- What is the true cost of the research process?

The traditional approach is often slow, expensive, and lacks crucial policy and regulatory insights.

## HDIG: A Decision-Ready System

HDIG integrates **private and public datasets with cross-functional expertise (technical + policy/regulatory)** into a single, decision-ready system for evaluating healthcare technology. We provide the tools and insights needed to make faster, more informed investment decisions.

### Key Features:

- Searchable Intelligence (startups, investors, hospitals)
- IP Prioritization and Evaluation (scoring and ranking)
- IP Landscape Exploration (valuation, technologies, competitors, licensing)

### Key Features (Continued):

- Funding Exploration (venture capital, grants, procurement)
- Policy and Regulatory Alignment
- Customizable Reporting

## The Outcome

With HDIG, you achieve:

- **Faster, policy-aware diligence:** Streamline your research process.
- **Cleaner go/no-go decisions:** Make informed choices with confidence.
- **Higher-confidence portfolio construction:** Build stronger, more resilient portfolios.

What takes weeks can now be accomplished in **days**, saving you valuable time and resources.

## Get Started Today

Send a pitch deck or patent for a portfolio company to receive an **HDIG Launch Report** for partner preparation. Unlock the power of data-driven decision-making and gain a competitive edge in the healthcare technology landscape. [Contact us](#) today to learn more.
